# Why COINFORGE

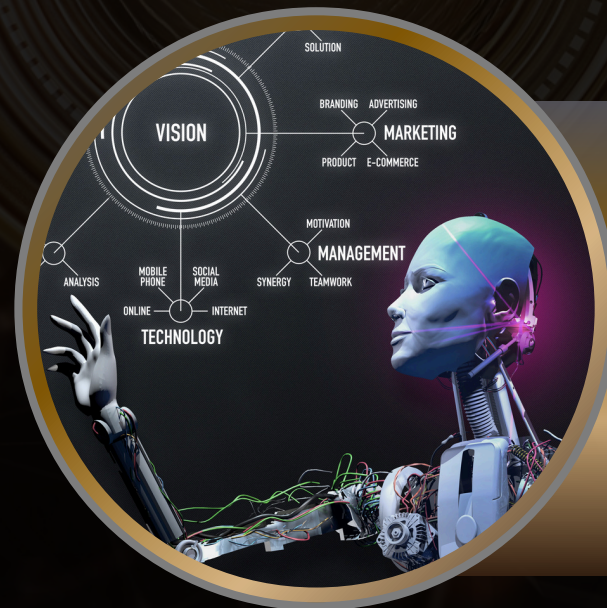

# COINFORGE

## Mission & Vision

### MISSION

Coinforge's mission is to enable individuals globally to earn, invest, and grow wealth securely through blockchain technology. By offering transparent, automated earning opportunities via smart contracts, we help users take control of their financial future

### VISION

Coinforge aims to be a leading blockchain platform, trusted by millions, where individuals achieve financial independence through secure, decentralised finance. We envision a future where blockchain technology drives inclusive economic growth for all

# BLOCKCHAIN Technology

A decentralised, secure, and transparent digital ledger that records transactions across multiple computers. It ensures data integrity through cryptographic security and eliminates the need for intermediaries. Used in cryptocurrencies, smart contracts, and decentralised applications, blockchain enables seamless, tamper-proof, and efficient digital transactions.

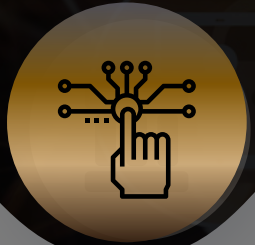

# CRYPTO Currency

Cryptocurrency is a digital or virtual currency secured by cryptography, making it decentralised and resistant to fraud. It operates on blockchain technology, enabling peer-to-peer transactions without intermediaries. **Bitcoin (BTC)**, the first and most recognised cryptocurrency, is often called digital gold and uses proof-of-work (PoW) for security. **Ethereum (ETH)** powers smart contracts and decentralised apps (dApps) and is transitioning to a proof-of-stake (PoS) model. **Polygon (MATIC)** enhances Ethereum's scalability with faster, low-cost transactions, while **Solana (SOL)** offers high-speed processing through its unique proof-of-history (PoH) mechanism. **Tether (USDT)**, a stablecoin pegged to the US dollar, provides stability in the volatile crypto market. Each of these cryptocurrencies plays a vital role in the evolving digital economy.

## Revenue Model

### 5- GEN MATRIX

Earn unlimited 40% direct referral income when your referrals activate any smart contract. This referral income is available for each activation, providing a continuous earning opportunity as you expand your network.

Receive 8% earnings across 5 levels based on your position in the 5- GEN smart contracts.

The 5 - GEN Tree generation follows a maximum 5-level matrix structure with duplication. Positions are filled in the nearest available slot after completing 5 direct referrals

This opens the opportunity to earn unlimited passive income of 8% from each of the 5 downline levels in the 5-GEN matrix, covering up to 3,905 tree members. The income is generated based on tree positions filled by your referrals or those of your upline

#### REFERRAL ACTIVE INCOME

## Generation Flow

# FORGE-RACE

## Priority Positioning

### How the Priority Positioning Works?

- If Mr. X refers a 6th partner, their position will be assigned as D2.
- The 7th referral will be placed in A3, and the 8th referral will be placed in B3 and so on..

Remember, the 5-level income will be distributed among the direct 5 uplines based on the assigned positions.

*Note: Priority positioning can be achieved through your referrals, your team's referrals, and your uplines.*

# FORGE-RACE

## Revenue Model

### GLOBAL SHARE

In the GLOBAL SHARE smart contracts, 40% of the earnings contribute to the GLOBAL SHARE of the respective contract, which is distributed among all activated members.

Note: Each GLOBAL SHARE smart contract has a separate GLOBAL SHARE and GROUP.

The GLOBAL SHARE smart contracts allow unlimited referrals without being restricted by any Tree system
